Mr. Lowell P. Braxton
Administrator
Mineral Resource Development &
Reclamation Program
DOGM
Salt Lake City, Utah

Dear Lowell:

I Met with Mr. Wayne Hedburg, Mr. Holland Shepherd, and Mr. Scott Johnson on Tuesday May 2, 1989, at the Iron Mountain Mine, concerning the Wet Magnetic Separation Of Iron Ore. Mr. Hedburg sent me the pertinent sections of your files concerning this operation.

The files cover the plan we intend on using; the only difference being the original plan showed returning the water to the Blackhawk Pit. The plan now would return the water to the Blowout Pit which is about 200 feet away.

The reason for this is to gravity flow the discharge instead of an up hill pumping situation. Either pit intersects the same water table.

We have filed with the State Water Resources to get a temporary point of diversion change. This is pending upon receipt of the fee required. I will send a copy upon receipt.

According to the information received, the plan was basically approved pending the posting of the Reclamation Bond which has been placed in a depository account.

If you can call and give me a verbal commitment it would be appreciated.

If you need further information please let me know. Thanks.

Sincerely,

Roy Benson
